

H.M.F. LIMITED

PROJECT SUPPLY & PROCUREMENT

Corporate Capability Statement

Jamaican-owned operating company | Agriculture | Project Supply | Technology

Positioning

HMF Project Supply provides contractors and project teams with consolidated sourcing, procurement coordination and delivery support for recurring project supplies. The model is designed to reduce purchasing friction without pretending to replace established manufacturers, importers or major hardware distributors.

Core promise

Source. Consolidate. Deliver.

H.M.F. Limited builds practical businesses around real operating capability, disciplined financial control and Jamaican enterprise development.

CAPABILITIES

Safety & PPE

Hard hats, visibility wear, gloves, eye and hearing protection, masks, first-aid and selected site-safety consumables.

Construction consumables

Abrasives, drill bits, fasteners, tie wire, adhesives, sealants, tapes, cable ties, marking and other repeat-use site items.

Tools & site supplies

Hand tools, wheelbarrows, ladders, hoses, tarpaulins, temporary site products and selected small equipment on request.

Electrical & plumbing consumables

Selected wire, conduit, fittings, valves, solvent cement, connectors, sockets, switches and urgent replacement items sourced to specification.

Project office & operational supplies

Office consumables, printing, signage, paper products and selected operational requirements.

PROCUREMENT MODEL

1. Customer RFQ

Customer submits an RFQ, BOQ, material list or recurring supply schedule with specification, quantity, location and required date.

2. Controlled sourcing

HMF checks existing supplier relationships, compares commercial options and confirms availability. Approved substitutions are documented.

3. Formal quotation

Customer receives a quotation stating scope, pricing, validity, delivery and commercial terms. HMF does not accept unsupported supply commitments.

4. Purchase order & fulfilment

Following customer approval or PO, HMF procures, consolidates and coordinates delivery to the agreed location.

5. Commercial control

Orders are tracked through delivery, invoicing and collection. Credit limits, margin discipline and working-capital exposure are controlled internally.

GOVERNANCE & CONTACT

Procurement integrity

HMF's procurement model is intended to operate on an arms-length, documented and auditable basis. Relationships do not replace formal vendor procedures, competitive evaluation or tender requirements.

Vendor due diligence

Corporate registration, tax/statutory evidence, insurance, public-procurement registrations and references are supplied or represented only when supported by current evidence. Sensitive documents are provided through controlled onboarding rather than published openly.
